Unaudited Interim Summary Financial Statements - 30 September 2018

COMMENTS ON RESULTS

The Bank posted a strong performance for the first quarter driven by the sustained growth in its local and foreign currency loan portfolio since the latter part of the last financial year. As a result, operating income increased by 19.9% to reach Rs 4,135 million, contributing to a rise of 25.5% in profit after tax for the quarter, which stood at Rs 2,022 million.

Net interest income grew by 27.4% to reach Rs 2,968 million mainly on account of the double digit growth in the local and international loan books and the higher average yields on the investments in MUR Treasury Bills.

Non-interest income rose by 4.3% to Rs 1,167 million. Net fee and commission income was flat at Rs 659 million with the growth in cards and regional trade finance activities offset by lower portfolio management fees. Other income grew by 10.9% to reach Rs 508 million as the fair value gain on equity instruments is now being reflected in the Statement of profit or loss, with the implementation of IFRS 9.

Operating expenses increased by 12.2% to Rs 1,505 million resulting from capacity building endeavours to support the bank's strategic objectives and in line with the business development currently being undertaken. Our Cost to Income ratio fell from 38.9% to 36.4% over the period.

Impairment charges grew by 36.5% to reach Rs 342 million with the increased loan book. Impairment charges to total loans increased marginally to reach 0.61% whilst the non performing loans to total loans ratio dropped below the 4.0% level. As reported, in the Summary statement of changes in equity, the net effect of adopting IFRS 9 due to impairment and taking into account the latest regulatory requirements, was a reduction of Rs 445 million in opening retained earnings as at 1 July 2018.

Profit before tax on a comparable basis improved by 24.3% to reach Rs 2,392 million. The share of foreign-sourced earnings improved further to 52% in line with our international diversification strategy.

Despite the increase in customer exposures, the Total and Tier 1 Capital Adequacy ratios as at 30 September 2018 remained at comfortable levels.

Going forward, the Bank remains confident that its growth momentum will be sustained as it continues to execute its numerous initiatives in support of its strategic objectives within a favourable external environment.
