#### **COMMENTS ON RESULTS**

Operating profit before impairment for the quarter ended 30 September 2020 improved by 13.4% compared to the same quarter last year and reached Rs3,356 million.

The growth was mainly from Net fee and commission income which rose by 14.5% and reached Rs931 million. This was the result of a strong performance from fee based income from cross border transactions which more than offset the drop in cards fees from the hospitality sector. In addition, Other income rose strongly by 49.9% to reach Rs655 million as the Bank noted a strong upturn in fair value gains from financial instruments amidst volatile markets.

Net interest income rose by 2.6% to reach Rs3,377 million as the Bank continues to experience pressures on both customer and excess liquidity margins. With the marginal increase in Non-interest expense by 1.6% to Rs1,608 million, the cost to income ratio reached an all-time low of 32.4%.

However, Profit for the period dropped by 16.4% to Rs1,893 million compared to the same quarter due to a charge of Rs1,215 million, which include Expected credit losses ('ECL') of Rs811 million in Net impairment of financial assets in this quarter compared to a charge of Rs380 million, which include ECL of only Rs67 million over the same quarter last year, during the pre-Covid 19 period. The annual cost of risk at the end of the quarter was 1.83%.

This significant increase in ECL reflects the inherent increase in credit risks and our forward looking view of the impact of the Covid-19 pandemic on our operations, based on certain assumptions made in our credit modelling exercise amidst significant and persistent uncertainties on how future developments will unfold not only locally but also in our major markets. The recent lockdowns in Europe will undoubtedly worsen the length of time before we see prolonged and strong recoveries in the impacted sectors.

Loans and advances to customers rose by 4.0% to Rs225.1 billion whilst Total deposits from customers rose by 15.3% to Rs369.6 billion, both partly impacted by the depreciation of MUR against major currencies compared to the same quarter last year. These trends comforted the Bank's liquidity position notably in foreign currencies. The Bank's foreign currency loans represented 62% of the funding base while its US dollar Liquidity Coverage Ratio stood at 189% as at 30 September 2020 which is well above the Basel III regulatory norm.

Shareholder's equity went up by 14.0% to reach Rs55.3 billion as at 30 September 2020 compared to the same quarter last year and the Bank's BIS ratio and Tier 1 ratio at 17.1% and 16.0% respectively, remained at comfortable levels.

#### OUTLOOK

The operating context remains particularly challenging, with little visibility on the evolution of the situation going forward especially with a second wave of the pandemic in many countries. Difficult market and economic conditions are likely to take their toll on customer segments across markets, albeit to varying degrees. Whilst some business segments, notably on the international front, are expected to be resilient, our operating results are likely to be down in view of restrained business activities amidst the economic slump and dampened investor confidence as well as squeezed margins.

Against this backdrop, the Bank will maintain its market vigilance and monitor the situation closely with regular assessment of potential scenarios and recently through its Internal Capital Adequacy Assessment Process stress testing to ensure it maintains adequate buffers to preserve its financial soundness.
